

Actual In-Ovation patients

Braces for All Ages

Today, more than 25-percent of all orthodontic patients are adults. Because In-Ovation R provides faster results with fewer appointments and less treatment time, more adults are choosing to improve their smile, health and confidence than ever before. Ask your doctor and find out why In-Ovation R is your best choice for a beautiful smile!

A Great Reason to Smile...

A healthy smile is an investment that lasts a lifetime. Speak to your orthodontist about the importance of good oral hygiene and maintenance of your braces during treatment. Ask your doctor if patient-friendly In-Ovation R braces can work for you. For more information on the benefits of braces and self-ligation, visit www.gacinovation.com.

Achieve a Radiant Smile!

A Beautiful Smile is Fast and Easy!

With In-Ovation® R system braces, achieving an attractive, healthy smile has never been easier or more comfortable. Their unique, patient-friendly design means that you have less chairtime, reduced discomfort and far fewer appointments than with older style braces.

Kassidy: actual In-Ovation patient

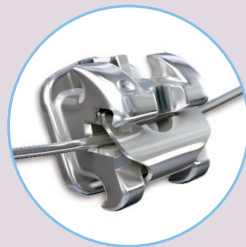

In-Ovation R is gentle because it softly guides your teeth into alignment. It uses a free-sliding technology which places little to no pressure on teeth. As a result, your

treatment not only takes less time and requires fewer appointments, but is far more comfortable than with traditional fixed-wire braces.

Traditional Braces

Elastics and ties used in older braces put pressure and friction on teeth which slows treatment and causes discomfort.

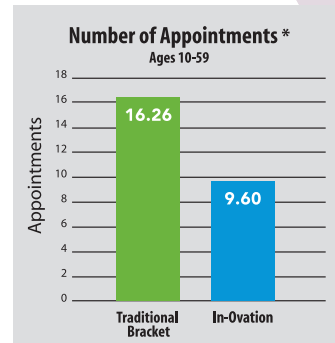

In-Ovation

With the In-Ovation R system, teeth are free to move more quickly, easily and comfortably.

In-Ovation R Means You Have...

- Shorter appointments
- Reduced treatment time
- Fewer adjustments and less appointments
- Greater comfort
- Improved facial proportion and appearance
- A dynamic, healthy and attractive smile!

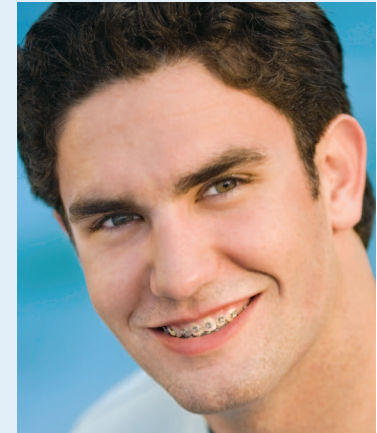

In-Ovation averages 40-percent fewer appointments than traditional brackets with ties.

Look Beautiful With In-Ovation R

Patients can now look their absolute best (during and after treatment). That's because the In-Ovation R is smaller and has a lower profile than other self-ligating braces. Plus, there are no elastic or metal ties! This means you have less irritation, less plaque build-up and less difficulty keeping your teeth clean.

Michael: actual In-Ovation patient

In-Ovation R does not just straighten teeth, its unique Interactive™ technology allows your doctor to gently achieve the precise results needed for optimum facial proportion and aesthetics through the last phase of your treatment. Now that's a reason to smile!
